- WHAT FLEIRE BRINGS

She teaches the operators.

Fleire does more than explain trends. She designs learning experiences that help people understand a new technology, use it responsibly, and produce something useful by the end of the room.

- AI literacy & responsible adoption — for students, teams, and leaders
- Hands-on AI workshops built around real tasks and tangible outputs
- Digital transformation grounded in people, process, and practical execution
- AI marketing systems that improve speed without sacrificing brand judgment
- Entrepreneurship & innovation from a Filipino founder building across markets
- Technology for social good and equitable access to digital opportunity

- SIGNATURE TOPICS

Talks built to land, not just impress

KEYNOTE

AI Literacy: From Curiosity to Responsible Use

How AI works, where it fails, and how people use it with judgment, ethics, and confidence.

WORKSHOP

Building With AI, Not Just Talking About It

Participants turn a problem into a working AI-assisted output, workflow, or presentation.

LEADERSHIP

AI Adoption Without the Hype

What teams must change in workflows, decisions, and culture before AI creates real value.

MARKETING

Marketing Systems That Outlast You

Using AI and automation to build consistent, scalable operations while protecting brand quality.

FOUNDERS

Filipino Founders Building for the World

Lessons from building ventures across the Philippines, Singapore, and the United States.

IMPACT

Technology for Social Good

How institutions use technology to widen access, build employability, and create local impact.

● FORMATS

How Fleire works with a room

- **Keynotes** — sharp, practical talks for conferences, leadership events, schools, and industry gatherings.
- **Workshops** — interactive sessions designed around participant outputs, guided exercises, and clear

next steps.

- **Multi-day learning programs** — foundational knowledge, responsible use, hands-on building, assessment, and presentations.
- **Curriculum & program design** — localized learning journeys, facilitator guides, student workbooks, assessments, train-the-trainer.
- **Executive & team advisory** — focused sessions for leaders adopting AI, redesigning workflows, or building internal capability.

● EXPERIENCE & CREDIBILITY

Built from running it, not reading about it

- **Founder, DashoContent** — an AI-enabled content operations platform
- **Founder, Third Team Ventures** — practical AI and digital systems
- **U.S. State Department** Professional Fellow
- **Alibaba Netpreneur** Training Program alumna
- **Certified ScrumMaster** · BS Information Technology, *cum laude*
- Former software developer turned founder & AI systems builder

● PROGRAMS & COMMUNITIES

Her work and programs have connected with **Aboitiz Equity Ventures**, **Megaworld**, **Sprout Solutions**, **AppWorks Accelerator**, **IdeaSpace Foundation**, **ASEAN**, the **U.S. State Department**, and Philippine government and education partners.

● WHY CLIENTS BRING FLEIRE IN

"Make it practical, make it locally relevant, and make sure people leave knowing what to do next."

- Translate technical material for a non-technical audience
- Localize an imported program for Filipino learners
- Balance innovation with responsible and ethical use
- Design for hands-on participation, not passive lectures
- Connect strategy, technology, communication, and real-world execution

● 2026 ENGAGEMENT DIRECTION

Where Fleire is focused this year

- AI literacy and responsible AI
- AI for marketing, business, and entrepreneurship
- Student and educator AI capability-building
- Digital transformation and workflow redesign
- Custom curriculum and facilitator development

- Founder and women-in-technology programs

Engagements are scoped on audience, outcomes, preparation, customization, delivery format, and licensing requirements.

- **ABOUT FLEIRE**

Fleire Castro is a Filipino founder, AI marketing systems builder, trainer, and technology-for-social-good advocate. She started her career as a software developer, built a digital marketing company, and went on to create technology ventures serving businesses across multiple markets.

Today, she helps organizations move from AI curiosity to useful, responsible adoption. Her approach is direct: teach the fundamentals, build around real problems, protect human judgment, and make every learning experience lead to action.

Based in the Philippines · Available for local, regional & international engagements
